EHA Architectural Wall Heater Ordering Guide

Reznor's EHA is a forced-air architectural electric wall heater designed to provide quick, dependable comfort in commercial and residential spaces. With its attractive architectural styling, compact wall-mounted design, and durable construction, the EHA is an ideal solution for areas affected by cold drafts or where supplemental heat is needed.

Benefits

- Fast, effective comfort with forced-air heating that quickly warms occupied spaces and helps offset cold drafts
- Attractive architectural design featuring a durable extruded aluminum grille and clean, low-profile appearance
- Flexible installation with recessed or surface-mount options and the ability to mount multiple units side-by-side
- Reliable operation with durable finned tubular heating elements and a factory-lubricated motor

Applications

Commercial

- Office buildings
- Schools and universities
- Healthcare facilities
- Retail stores
- Hotels and hospitality spaces
- Public buildings
- Lobbies, corridors, and entryways

Residential

- Apartments and condominiums
- Living areas
- Home additions and renovations
- Entryways and mudrooms
- Basements and supplemental heating areas
