ECS Ceiling-Mounted Heater Ordering Guide

Reznor's ECS is a flush-mounted electric ceiling heater designed to provide supplemental warmth and improved air circulation while helping preserve valuable wall and floor space. Ideal for commercial, institutional, and industrial applications, the ECS delivers reliable comfort through a low-profile design that blends seamlessly into a variety of ceiling constructions.

Benefits

- Flush-mounted ceiling design helps maximize usable wall and floor space while maintaining a clean, unobtrusive appearance
- Helps improves occupant comfort by circulating warm air downward from ceiling level into occupied spaces
- Versatile installation options accommodate a variety of ceiling types and building layouts
- Reliable, long-lasting operation with an enclosed lifetime-lubricated ball-bearing motor and durable tubular heating elements
- Flexible electrical configurations with a broad range of voltage and phase options for new construction and retrofit projects

Applications

Commercial & Institutional

- Retail stores
- Office buildings
- Showrooms
- Schools and universities
- Healthcare and medical facilities
- Hotels and hospitality spaces
- Public buildings and transportation terminals
- Churches and community centers
- Exhibition and convention spaces

Industrial

- Warehouses and distribution centers
- Manufacturing facilities
- Food and beverage facilities
- Maintenance and utility areas
- Supplemental heating applications
