DTH Docked Trailer Comfort Solutions Ordering Guide

Reznor's DTH is a purpose-built electric comfort solution designed specifically for docked trailers, providing rapid, reliable heating and ventilation to help improve worker comfort and productivity during loading and unloading operations. With fast warm-up times, year-round functionality, and durable industrial construction, the DTH is an innovative solution for warehouses, logistics facilities, and distribution centers.

Benefits

- Rapid heating quickly warms cold trailers, helping improve working conditions and reduce downtime during loading and unloading operations
- Year-round functionality with fan-only mode for air circulation and worker comfort during warmer months
- Helps improve employee productivity by creating a more comfortable trailer environment during extreme weather conditions
- Durable industrial construction featuring a painted galvanized-steel cabinet with scratch-resistant finish
- Flexible discharge nozzle helps minimize damage from incidental contact with forklifts and loading equipment
- Quiet, dependable operation with a vibration- and noise-isolated fan motor
- Simple installation and operation with easy wall-switch activation and minimal impact on dock door space

Applications

Warehousing & Logistics

- Distribution centers
- Loading docks
- Shipping and receiving facilities
- Third-party logistics (3PL) operations
- Cross-docking facilities

Industrial & Commercial

- Manufacturing facilities
- Transportation and fleet operations
- Cold-weather loading areas
- Regional distribution hubs
- E-commerce fulfillment centers
