TECHNICAL SPECIFICATIONS—CONTINUED

Unit Sizes

These heaters are available in fourteen unit sizes based on 30,000–400,000 BTUh input.

Features

- Integrated circuit board with seven-segment display
- Easily-viewed status-indicating LED
- Hinged access door panel with quarter-turn latch
- Improved cabinet design with removable front face
- Two-toned black and white glossy, scratch-resistant paint scheme
- Patented single-burner combustion system
- Natural gas or propane
- 45–75°F temperature rise (unit sizes 30–350)
- 50–80°F temperature rise (unit size 400)
- TCORE²® titanium-stabilized aluminized-steel heat exchanger
- External terminal strip for 24V wiring
- Built in disconnect switch
- Four-point suspension standard on all unit sizes

Factory-Installed Options

Some options are not available on all unit sizes. Motor options AL2–AL26 are not available for unit sizes 30–125.

Option	Description
AA1	Natural gas
AA2	Propane
AC1	Aluminized-steel heat exchanger
AC2	409 SST heat exchanger
AC4	316 SST heat exchanger
AG1	Single-stage combination gas valve
AG2	Two-stage combination gas valve
AK1	115/1/60 voltage
AK2	208/1/60 voltage
AK3	230/1/60 voltage
AK5	208/3/60 voltage
AK6	230/3/60 voltage
AK7	460/3/60 voltage
AK8	575/3/60 voltage
AL2	1/4-HP open drip-proof motor
AL3	1/3-HP open drip-proof motor
AL4	1/2-HP open drip-proof motor
AL5	3/4-HP open drip-proof motor
AL6	1-HP open drip-proof motor
AL7	1-1/2-HP open drip-proof motor
AL8	2-HP open drip-proof motor
AL9	3-HP open drip-proof motor
AL10	5-HP open drip-proof motor
AL19	1/4HP totally-enclosed motor
AL20	1/3-HP totally-enclosed motor
AL21	1/2-HP totally-enclosed motor
AL22	3/4-HP totally-enclosed motor
AL23	1-HP totally-enclosed motor
AL24	1-1/2-HP totally-enclosed motor

Option	Description
AL25	2-HP totally-enclosed motor
AL26	3-HP totally-enclosed motor
AM1	401–450 RPM belt drive
AM2	451–500 RPM belt drive
AM3	501–550 RPM belt drive
AM4	551–600 RPM belt drive
AM5	601–650 RPM belt drive
AM6	651–700 RPM belt drive
AM7	701–750 RPM belt drive
AM8	751–800 RPM belt drive
AM9	801–850 RPM belt drive
AM10	851–900 RPM belt drive
AM11	901–950 RPM belt drive
AM12	951–1000 RPM belt drive
AM13	1001–1050 RPM belt drive
AM14	1051–1100 RPM belt drive
AM15	1101–1150 RPM belt drive
AM16	1151–1200 RPM belt drive
AM17	1201–1250 RPM belt drive
AM18	1251–1300 RPM belt drive
AM19	1301–1350 RPM belt drive
AN2	IEC contactor (standard unless starter is required)
AN10	IEC starter
AX2	Horizontal louvers
AX4	Duct flange
AZ6	Inlet blower and belt guard
AZ7	Inlet blower guard
BY1	US rating plate
BY3	US/Canada rating plate
DR1	Direct-drive blower
DR4	Belt-drive blower

Field-Installed Options

Option	Description
CC2	Vertical vent terminal/combustion air kit
CC6	Horizontal vent terminal/combustion air kit
CD1	Vertical louvers, direct discharge air to provide wider throw pattern
CD2	Downturn nozzle, 25- to 65-degree variable air deflection range
CD3	Downturn nozzle, 50- to 90-degree variable air deflection range
CD4	Downturn nozzle, 25- to 65-degree variable air deflection range with vertical louvers
CD5	Downturn nozzle, 50- to 90-degree variable air deflection range with vertical louvers
CD9	Duct flange
CD10	Inlet blower and belt guard
CD11	Polytube adapter
CD12	Inlet blower guard
CE1	Manual shutoff valve, natural gas or propane
CG1	208V–115V stepdown transformer
CG2	230V–115V stepdown transformer
CG4	460V–115V stepdown transformer
CK10	Adapts 3/8-inch hangers for four-point suspension from 1-inch threaded pipe
CL1	Single-stage thermostat
CL22	Two-stage thermostat
CL31, CL32	Multiple fan control: option CL31 includes components for one control unit and one additional unit—option CL32 includes components for each additional non-control unit
CM1	Locking cover for CL1 thermostat
CM1B	Locking cover for CL22 thermostat
CM3	Bracket assembly for mounting thermostat on unit
DJ20	High-elevation conversion
DL2	Propane conversion

TECHNICAL SPECIFICATIONS—CONTINUED

Certification

These unit heaters are listed by Intertek for use in industrial and commercial installations in the United States and Canada.

Installation Codes

- These units must be installed in accordance with local building codes. In the absence of local codes, in the United States, the unit must be installed in accordance with the *National Fuel Gas Code*, ANSI Z223.1. A Canadian installation must be in accordance with the CSA B149 *Natural Gas and Propane Installation Code*. This code is available from CSA Information Services, 1-800-463-6727. Local authorities having jurisdiction should be consulted before installation is made to verify local codes and installation procedure requirements.
- Installations in aircraft hangars should be in accordance with ANSI/NFPA No. 409 (latest edition), *Standard for Aircraft Hangars*. Installations in public garages should be in accordance with ANSI/NFPA No. 88A (latest edition), *Standard for Parking Structures*. Installations in repair garages should be in accordance with ANSI/NFPA No. 88B (latest edition), *Standard for Repair Garages*. In Canada, installations in aircraft hangars should be in accordance with the requirements of the enforcing authorities, and in public garages, in accordance with the CSA B149 code.
- If the heater is being installed in the Commonwealth of Massachusetts, installation must be performed by a licensed plumber or licensed gas fitter.

Sound level @ 15 feet	dBa	51	52	53	56	56	59	61	62
*ETL ratings for elevations up to 2,000 feet.									
**Size shown is for gas connection to a single-stage gas valve—not supply line size.									
***Smaller and/or larger vent and combustion air pipe diameters may be permissible (refer to appropriate venting instructions).									
†MOCP = 2.25 × (largest motor FLA) + smallest motor FLA. Answer is rounded to the next lower standard circuit breaker size.									

Clearances

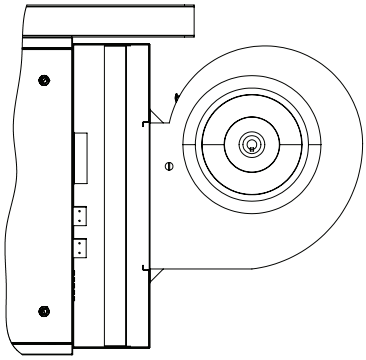

Units must be located so that clearances are provided for with regards to combustion air space, inspection, and service and for proper spacing from combustible construction. Clearance to combustibles is defined as the minimum distance from the heater to a surface or object for which it is necessary to ensure that a surface temperature of 90°F (50°C) above the surrounding ambient temperature is not exceeded.

Heater Surface	Unit Size (MBTUh)	
	30–125	150–400
	Minimum Clearance (Inches (mm))	
Top	1 (25)	4 (102)
Flue connector	6 (152)	6 (152)
Access panel	18 (457)	18 (457)
Non-access side	1 (25)	2 (51)
Bottom*	1 (25)	1 (25)
Rear**	18 (457)	18 (457)
*Suspend the heater so that the bottom is a minimum of 5 feet (1.5 meters) above the floor.		
**Measure rear clearance from the fan motor.

Hazards of Chlorine

The presence of chlorine vapors in the combustion air of gas-fired heating equipment presents a potential corrosion hazard for separated-combustion heaters with regard to the combustion air inlet. Chlorine is usually found in the form of freon or degreaser vapors. When chlorine is exposed to flame, it will precipitate from the compound and go into solution with any condensation that is present in the heat exchanger or associated parts. The result is hydrochloric acid, which readily attacks all metals including 300 grade stainless steel. Care should be taken to separate these vapors from the combustion process. This may be done by wise location of the unit vent and combustion air terminals with regard to exhausters or prevailing wind directions. Chlorine is heavier than air. Keep these facts in mind when determining installation location of the heater in relation to building exhaust systems.

Gas Supply Pressure

The unit is equipped for a maximum gas supply pressure of 1/2 psi, 3.5 kPa, or 14 IN WC.

NOTES:

Supply pressure higher than 1/2 psi requires the installation of an additional service regulator external to the unit.

PRESSURE TESTING SUPPLY PIPING

- **Test pressures above 1/2 psi—disconnect the heater and manual valve from the gas supply line to be tested. Cap or plug the supply line.**
- **Test pressures below 1/2 psi—before testing, close the manual valve on the heater.**

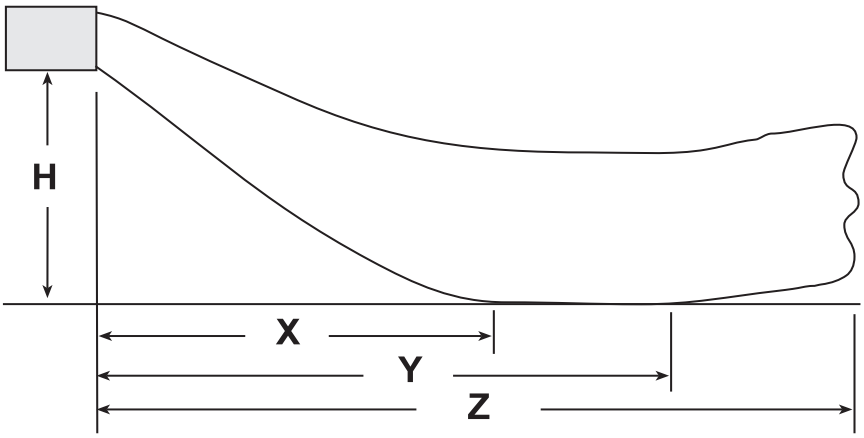

Gas Supply Piping

- All piping must be in accordance with requirements outlined in the *National Fuel Gas Code* (ANSI/Z223.1, latest edition) or the *Natural Gas and Propane Installation Code* (CSA-B149.1).
- The heater is orificed for operation with natural gas having a heating value of 1,050 (±50) BTU per cubic foot or with propane gas having a heating value of 2,550 (±100) BTU per cubic foot. Sizing of gas supply lines depends on piping capacity and is based on cubic feet per hour based on a 0.3 IN WC pressure drop, a 0.6 specific gravity for natural gas at 1,050 BTU per cubic feet, and a 1.6 specific gravity for propane at 2,550 BTU per cubic feet. If the gas at the installation does not meet this specification, consult the factory for proper orificing.
- Variables for sizing gas supply lines are listed in the table below. When sizing supply lines, consider possibilities of future expansion and increased requirements. Refer to the *National Fuel Gas Code* for additional information on line sizing.

Length of Pipe (Feet)	Diameter of Pipe (Inches)											
	1/2		3/4		1		1-1/4		1-1/2		2	
	Natural Gas	Propane	Natural Gas	Propane	Natural Gas	Propane	Natural Gas	Propane	Natural Gas	Propane	Natural Gas	Propane
	Cubic Feet per Hour

Heater Throw Distances with Standard Horizontal Louvers

The graphic shows throw patterns and the table lists throw distances for heaters suspended at varying mounting heights. The louver angles listed are relative to the top of the heater.

H = Distance from bottom of heater to the floor
X = Distance from heater to start of floor coverage
Y = Distance to end of floor coverage
Z = Distance at which air velocity drops below 50 feet (15.2 meters) per minute

H* (Feet (Meters))	Distance* or Angle	Low Speed						75°F (42°C) Rise
		Unit Size (MBTUh)						
		30	45	60	75	100	125	150
		Feet (Meters)

⚠ DANGER ⚠

FIRE OR EXPLOSION HAZARD

- **Failure to follow safety warnings exactly could result in serious injury, death, or property damage.**
- **Improper installation, adjustment, alteration, service, or maintenance can cause serious injury, death, or property damage.**
- **Installation and service must be performed by a qualified installer, service agency, or the gas supplier.**
- **Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.**

WHAT TO DO IF YOU SMELL GAS

- **Do not try to light any appliance.**
- **Do not touch any electrical switch; do not use any phone in your building.**
- **Leave the building immediately.**
- **Immediately call your gas supplier from a phone remote from the building. Follow the gas supplier's instructions.**
- **If you cannot reach your gas supplier, call the fire department.**
