EHL Residential Wall Heater Ordering Guide

Reznor's EHL is a compact, high-efficiency electric wall heater designed for residential and light commercial applications where space is limited. With versatile mounting options, quiet operation, and an attractive design, the EHL delivers reliable warmth and comfort while blending seamlessly into virtually any interior environment.

Benefits

- Space-saving compact design ideal for small rooms, entryways, and supplemental heating applications
- Flexible installation with the ability to mount in multiple orientations to direct warm air where it is needed most
- Quiet, comfortable operation with an axial fan for gentle air circulation
- Dependable performance from a durable finned tubular heating element and high-efficiency heating design
- Attractive appearance with white or almond color options and a durable powder-coated finish

Applications

Commercial & Institutional

- Retail stores
- Offices
- Showrooms
- Schools and educational facilities
- Healthcare and medical offices
- Churches and community buildings

Residential

- Bedrooms
- Living rooms
- Apartments and condominiums
- Entryways and hallways
- Home offices
- Room additions and renovations
- Supplemental heating areas

Reznor logo will appear in the same color as selected cabinet color (white or almond).
