EPH Electric Plenum-Rated Unit Heater Ordering Guide

Reznor's EPH is a plenum-rated electric unit heater engineered for concealed ceiling and plenum-space applications where powerful heating is required without compromising usable space or aesthetics. Designed for flexibility, and reliable performance, the EPH helps deliver dependable comfort in both suspended ceiling cavities and ducted heating systems.

Benefits

- Hidden installation above suspended ceilings helps keep heating equipment out of sight while maximizing usable floor and wall space
- Zero-clearance approved design allows installation in tight plenum and concealed ceiling spaces
- Flexible installation with both horizontal and vertical mounting options to accommodate a variety of building layouts
- Advanced factory-installed controls, disconnects, and thermostat options help simplify integration into building systems
- Durable heavy-gauge steel construction provides long-lasting performance in demanding commercial environments
- Customizable airflow with optional adjustable louvers for targeted heat distribution
- Wide range of voltage, phase, and capacity options supports both new construction and retrofit applications

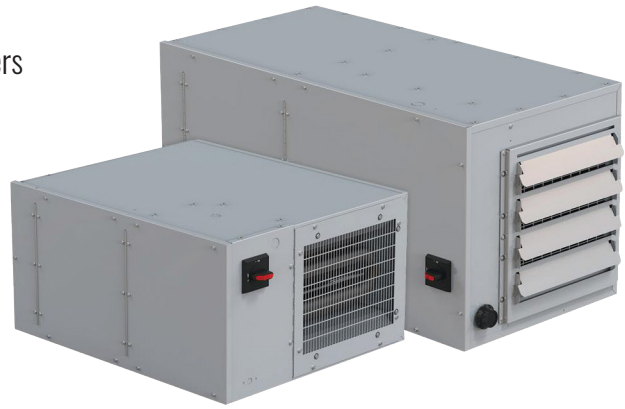

Applications

Commercial

- Office buildings
- Vestibules and entryways
- Retail spaces
- Schools and educational facilities
- Healthcare facilities
- Multi-tenant commercial buildings

Industrial & Utility Spaces

- Warehouses and distribution centers
- Stairwells
- Underground parking facilities
- Crawl spaces
- Mechanical rooms
- Concealed plenum spaces
- Ducted heating systems
